This is an important book for anyone who is serious about introducing or sustaining democratic leadership in schools. Busy practitioners will get much from it by going straight to the chapters about how democratic leadership could be made to work. I found this an interesting and stimulating book. The book's ideas are a useful counterpoint to some of the daft notions of macho leadership and management being peddled in education and indeed the public sector more widely. Woods' book has the merits that, though radical, it seeks to base its recommendations in the real world and to argue that there are possibilities for change that can bring about real improvements in everyone's experience and outcomes. Matching the rhetoric of democracy with reality - or at least making them closer - might also improve the quality of our political process, and hence increase interest and reduce cynicism about politics, something which surely should be welcomed. Woods' agenda is significant and his book certainly worth reading.

Philip Woods productively refocuses our attention, not on heroes and visions but on how we understand and practise within educational institutions in ways that are social and relational. He provides a realistic and yet challenging analysis of democratic leadership in ways that speak to practitioners, policy makers and researchers. We deal everyday with issues of social justice, and Philip Woods shows us how we might think differently about it, and so work for a better system of learning and schooling.

This book challenges many of the assumptions inherent in educational policy and conventional approaches to leadership. It is about understanding and exploring both the idea of democratic leadership and its practical relevance through examples drawn from practice and research. This book is for practitioners and students on professional development and academic courses. It will be essential reading for all policy-makers, academics and others (such as inspectors) who critically examine leadership and management of educational institutions. Every now and then a book is written in the field of leadership that stands out, says something different, is coherent, original and makes us really ponder and think. This is such a book - it will provoke policy-makers, academics, experienced practitioners and advanced students.

Building Leadership Capacity For School Improvement, Harris, Alma, Lambert, Linda, May 1, 2003, Education, 156 pages. Offers a perspective on the relationship between leadership and school improvement. This book emphasises the importance of maximising the leadership capabilities of all those.
